

ALARM SCHEMES

The radio alarm scheme in Stockport operated through a central control room and mobile wardens responded to the alarm

1. The control centre in Stockport Town Hall

2. An elderly person with an individual alarm

3. Alarm schemes depend on close links between housing and social services. The senior housing adviser discusses the assessment of an elderly person with an official from social services

4. The scheme has been used to replace resident wardens in grouped housing schemes. The mobile warden checks the alarm outside the scheme to see which person to visit
